

Professional Services

A set of tailored Professional Services to support businesses and institutions to make the most out of sobloo and accelerate the development of value.

Support, training and consulting from sobloo experts in three main areas:

1) Infrastructure & Cloud

a. Cloud expert services

- With the aim of offering specialized technical assistance in your digital transformation and the management of our applications

b. Design & transition

- Design and validate the target cloud architecture that will host your applications and support the migration of your applications on the cloud

c. Cloud readiness assessment

- Analyse the eligibility of your infrastructure to migrate on the cloud and build a customized cloud migration roadmap

d. GDPR compliance assessment

- Audit and consulting on awareness and compliance with GDPR (General Data Protection and Regulation)

2) Data & Applications

a. Technical & Thematic Support on sobloo Catalogue

- Support to access and understand catalogue content (Data, API, Tools) and value its potential (Hot-Line / Expertise / Demo)

b. Data Expertise & Consulting

- Support for the Development of Applications, Algorithms, APIs and Tools. For example : analyse your data/format, specify the relevant ingestors, specify the API for access

c. Support to Third-Party Services Integration

- Integration assessment of your service in Sobloo

d. Integration and Operations of Third-Party Services

- Support to Third-Parties willing to handle the full integration, deployment and operations of their services in sobloo

3) Business Development

a. B2B Solutioning

- Business Case Support, End-User Solutions design

b. Promotion Activities

- Communication, Advocacy, Marketing
